

The new KEF XQ60b subwoofer

KEF's famous XQ range has a new member: a subwoofer has been developed that superbly matches the premium XQ floorstanding speakers and shelf speakers regarding optical and sound level. The XQ60b has an attractive design, uses the most up-to-date technologies and offers an exceptional sound quality.

The most modern generation of digital amplifiers, a sealed cabinet and a powerful chassis all facilitate a bass foundation that descends precisely to the lowest bass depths.

Here are the particular characteristics of the XQ60b:

- Deep and precise bass output thanks to the most up-to-date technology
- KEF, SmartConnect simplifies connection to the amplifier or AV receiver
- high gloss black design with excellent finish
- Powerful digital amplifier with many settings
- Perfect match to existing speakers possible
- 30cm bass driver (downfire) in sealed cabinet

smart
CONNECT

The new KEF Smart Connect development allows the comfortable connection of the subwoofers via any user-defined cable (cinch mono, cinch stereo or speaker output) with an automatic recognition system and speaker adjustment. Therefore, a re-adjustment of the volume when changing the input or by using the "Y adapter" is no longer required.

Technical data:

- 200 Watt Class D-amplifier
- 30cm bass driver with aluminium frame, downfire
- Sealed cabinet (49l volume) for extreme base depths
- Frequency range of 26-140Hz (-6dB)
- 111dB maximum output
- KEF Smart-Connect
- High-Level-Speaker input
- All inputs can be used parallel
- Perfect adjustment to all speaker types possible
- Phase selectable 0° or 180°
- 3 steps selectable bass boost (0dB, 6dB, 12dB)
- Crossover frequency can be set from 40Hz to 140Hz
- New, improved fourth order crossover (24dB per octave)
- Maximum power input 200 Watt
- Dimensions (H x W x T) 444mm x 587mm x 415mm
- Weight 21.4 kg
